Professional Summary

MCA student and aspiring Java Backend Developer with hands-on experience in Java, Spring Boot, JDBC, Hibernate, MySQL, MongoDB, and REST APIs. Skilled in developing backend applications, RESTful services, database-driven systems, and CRUD operations. Strong foundation in Object-Oriented Programming, DBMS, SQL, MVC architecture, and software development, with practical experience in debugging, API testing, and database integration, along with strong problem-solving and team collaboration skills.

Technical Skills

Programming Languages: Java, Python, PHP, SQL

Backend Technologies: Spring Boot, JDBC, Hibernate, REST APIs

Databases: MySQL, MongoDB

Web Technologies: HTML, CSS, JavaScript

Tools: Git, GitHub, Maven, Postman, MySQL Workbench

Core Concepts: OOP, DBMS, SQL, Data Structures, REST APIs, MVC Architecture

Internship Experience

TECHREDDY IT SOLUTIONS, NASHIK

Backend Developer Intern | Jan 2026 – Feb 2026

- Developed backend functionality using Java and Spring Boot.
- Designed and tested RESTful APIs using Postman.
- Implemented CRUD operations and MySQL database integration.
- Debugged API and database-related issues during application development.

Projects

Disaster & Emergency Alert System — Backend Developer | [Live](#)

Java | Spring Boot | REST API | MySQL | HTML | CSS | JavaScript

- Developed REST APIs for submitting and managing disaster reports and emergency alerts.
- Implemented CRUD operations using Spring Boot and MySQL for report and alert management.
- Integrated frontend pages with backend APIs for real-time data submission and retrieval.
- Tested and debugged REST APIs using Postman to ensure reliable data communication between the frontend, backend, and MySQL database

Counterfeit Product Detection System | Backend Developer

Java | Spring Boot | REST API | MySQL | Python | Flask | PyTorch

- Developed Spring Boot REST APIs for user authentication, product image analysis, prediction history, and admin operations.
- Integrated Java Spring Boot with Flask AI services for product image processing and authenticity analysis.
- Implemented MySQL database integration for users, product analysis results, and prediction history.

ADR-DETECT — Interactive Pharmacovigilance Module | Full-Stack Developer

Java | Spring Boot | REST API | Spring Data JPA | MySQL | React | Tailwind CSS

- Developed a web-based pharmacovigilance module for detecting, assessing, and reporting adverse drug reactions (ADRs).
- Built Spring Boot REST APIs with Spring Data JPA for case management, ADR assessment, scoring, and reporting workflows.
- Implemented an interactive Detect → Assess → Intervene → Report → Learn workflow with dynamic case data and assessment results.

Education

Master of Computer Applications (MCA) | 2025–2027

K. K. Wagh Institute of Engineering Education & Research, Nashik

CGPA: 7.25

Bachelor of Computer Science (BCS) | 2022–2025

K. K. Wagh ACS & CS College, Nashik

CGPA: 9.37

Certifications

- AI Tools & Claude Workshop — be10x | September 2026
- Adobe Journey Optimizer for Developers – Expert
- Adobe Workfront Core Developer – Professional
- MKCL iLike – Python Fundamentals and Programming Basics (30 Hours)

Extracurricular Activities

- KKWIEER ACE Club Member
 - Participated in technical and non-technical sessions
- Events Volunteer
 - Assisted in technical and departmental events, including ASCEND coordination.
